Graphic Design Club

Design System → Responsive Website

Brand identity / Primitives / Semantic tokens
Reusable components / Development / System test

BRAND

SYSTEM

BUILD

01 Brand direction

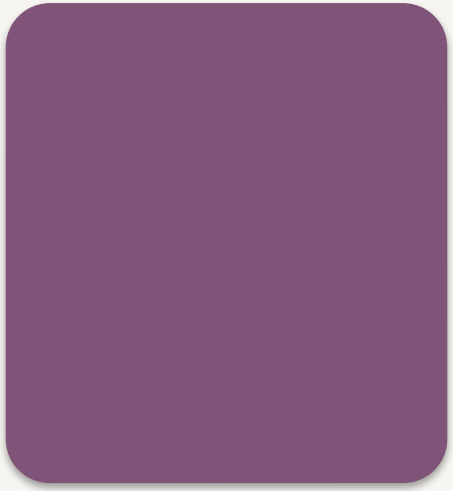

A creative space for students to explore, collaborate, learn, and share work.

Visual direction

- Editorial scale and bold headings
- Geometric and dimensional artwork
- Plum, teal, yellow and neutral surfaces

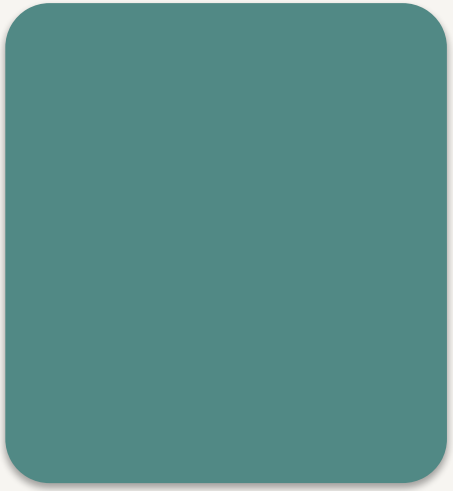

GDC brand asset from website package

02 Colour primitives and visual language

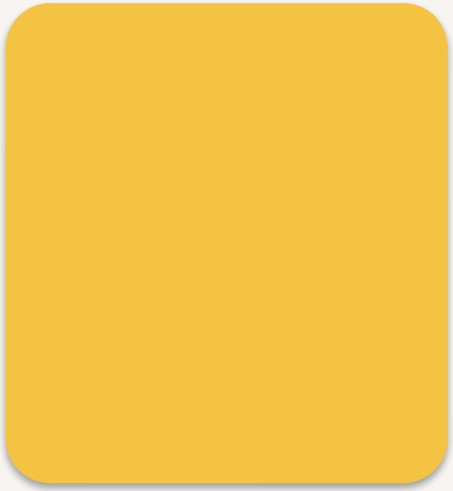

PLUM

#805478

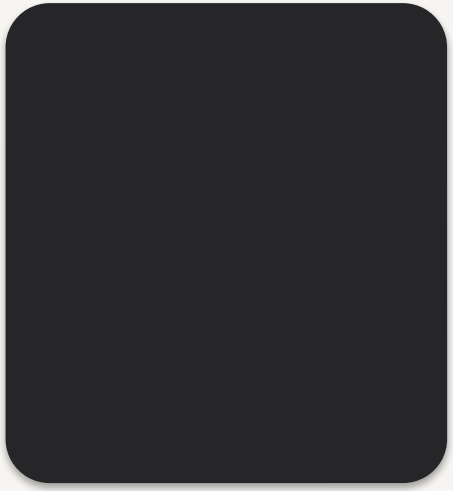

TEAL

#518985

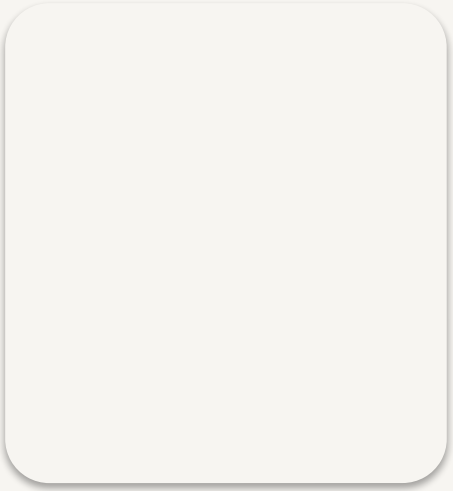

YELLOW

#F4C342

INK

#262629

PAPER

#F7F5F1

Brand primitives are reused as section surfaces, card variants, text and accents.

03 Primitives → semantic tokens

COLOUR PRIMITIVES	color/brand/primary · secondary · accent
TYPE PRIMITIVES	type/display · heading · body
SPACING PRIMITIVES	space scales for gaps and section padding
RADIUS PRIMITIVES	radius/card for rounded surfaces

Semantic names describe purpose so the same system can support new content.

04 Reusable components & variants

Figma component library: 38 components and 10 component sets (audit of current file).

Interface states

Navigation links
Primary button
Default / Hover states

Component sets expose Type variants; interface elements also use interaction states.

05 Responsive layout strategy

DESKTOP

1440px

Multi-column content and three-across event cards

TABLET

768px

Reflow into a vertical card layout and compact navigation

MOBILE

390px

Single-column flow, resized type and touch-friendly spacing

Layouts adapt their navigation, typography, spacing, grids, cards, images and content flow.

06 Completed page structure

- Hero / Masthead
- About
- Featured Work
- Tutorials
- Club Activities
- Upcoming Events
- Get Involved
- Footer

The same section order is represented in the working HTML project and Figma page.

07 Development workflow

Figma design
↓
HTML + CSS + JavaScript

Code refined using GitHub Copilot and iterative visual comparison with Figma.

Original website visual asset

08 System test: Upcoming Events

New content, existing design system — no new visual language required.

WORKSHOP

Creative Lab Sessions

Experiment and share ideas

CHALLENGE

Design Sprint

Respond to a creative brief

COMMUNITY

Portfolio Meetup

Exchange portfolio feedback

Reused: semantic colours, Inter typography, card radius, spacing, CTA pattern and card variants.

09 Testing and quality checks

- Compare Figma and coded layouts at 1440 / 768 / 390 px
- Test navigation links, menus, hover and scroll interactions
- Verify card readability, image scaling and content order
- Check keyboard navigation, contrast and reduced-motion preferences
- Recheck links and responsive behaviour before submitting

Testing checklist supplied with this submission package.

10 Final hand-in

01 Figma design system and responsive frames
02 Working HTML/CSS/JS project via GitHub
03 Process documentation and Upcoming Events system test
